PROFESSIONAL SUMMARY

Results-driven B.Tech Computer Science (Data Science) student with strong skills in machine learning, Python, and full-stack web development. Experienced in building end-to-end applications using React, Node.js, Flask, and MongoDB. Passionate about artificial intelligence and data-driven solutions. Seeking an AI/ML internship to apply machine learning algorithms, data analysis, and software engineering skills in a real-world environment.

EDUCATION

Guru Tegh Bahadur Institute of Technology

2023 – 2027

Bachelor of Technology – Computer Science & Engineering (Data Science Specialization)

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Database Management Systems, Python Programming, Web Technologies, Statistics for Data Science

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, HTML5, CSS3

AI / Machine Learning: Machine Learning, Deep Learning, Natural Language Processing (NLP), Data Analysis, NumPy, Pandas, Scikit-learn, TensorFlow (Beginner)

Web Development Frameworks: React.js, Node.js, Flask, Express.js

Databases: MongoDB, SQL, MySQL

Tools & Platforms: Git, GitHub, REST APIs, Google Maps API, VS Code, Postman

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming (OOP), Problem Solving, Agile Development

PROJECTS

Ride-Sharing Full-Stack Application | Personal Project

2024

- Engineered a full-stack ride-sharing platform using React.js, Node.js, Express.js, and MongoDB, supporting real-time ride booking and management for concurrent users.
- Integrated Google Maps API for live GPS tracking and optimized route mapping, reducing estimated route calculation time by 30%.
- Implemented JWT-based secure user authentication and role-based access control, ensuring data security for all users.
- Applied RESTful API design principles to build modular backend services, improving code maintainability and scalability.
- Technologies: React.js, Node.js, MongoDB, Express.js, Google Maps API, JavaScript, HTML5, CSS3

Digital Diary Web Application | Personal Project

2024

- Developed a secure full-stack personal journaling application using Python, Flask framework, and a responsive HTML/CSS/JavaScript frontend.
- Designed and implemented server-side data persistence logic with structured storage and retrieval, ensuring 100% user data integrity.
- Built a clean, mobile-responsive UI enabling seamless journal entry creation, editing, and browsing, improving overall user experience.
- Applied software engineering best practices including modular code structure, error handling, and input validation.
- Technologies: Python, Flask, HTML5, CSS3, JavaScript, SQLite

CERTIFICATIONS & ONLINE COURSES

- Python for Everybody – Coursera / University of Michigan (Completed)
- Data Structures & Algorithms – Self-study (LeetCode 50+ problems solved)

- The Web Developer Bootcamp – Udemy (React, Node.js, MongoDB)
